- Participated in seminar on “Education opportunities in global universities” held in Radisson Hotel in 2025

PROJECTS

1. E-Commerce website:

Software Used: HTML, CSS and JavaScript

Project Description:

- The frontend is the user-facing part of an e-commerce site where customers browse and interact with products.
- It ensures a seamless, visually appealing, and intuitive shopping experience.
- Serves as the main touchpoint to deliver a positive and engaging customer experience.

2. Portfolio Website:

Software used: HTML, CSS and JavaScript

Project Description:

- The backend handles all behind-the-scenes operations to ensure the portfolio website functions smoothly.
- It manages data, stores content, and handles user interactions efficiently.
- Provides security for sensitive information and maintains overall website reliability.

3. Job Portal:

Software Used: Java, Servlet, JSP, JDBC

Project Description:

- Built a job portal website where users can search, apply, and manage job listings.
- Developed the frontend using JSP, HTML, CSS, and Servlets to create a dynamic and responsive user interface.
- Implemented the backend using Java (JDBC), Servlets, and MySQL to manage database operations, user authentication, and job listings efficiently.
